

HEADSTART® GOLD

Seed Treatment

Headstart® GOLD

Get your grass off to a flying start!

Headstart® GOLD is the latest in seed treatment technology for grass seeds. The coating improves performance and ensures maximum germination and establishment so that a healthy well rooted sward can grow. Headstart® GOLD is a further development of the well-recognised HEADSTART® treatment and has been developed using the latest scientific findings and field experience.

Biostimulants

- Promotes the supply of nutrients
- Ensure efficient use of nutrients
- Prevent deficiency of trace elements

Enzyme Activity

- Stimulates growth of roots/shoots
- Energy to start photosynthesis

Seaweed Extract with High Cytokinin Content

- Promotes cell division & metabolism
- Leads to faster germination

Molybdenum (Mo)

- Essential trace element for initial growth
- Required for enzymes that are involved with protein formation

Copper (Cu)

- Important trace element for re-growth
- Part of enzymes in photosynthesis/metabolism
- Stimulates production of lignin rigid cell walls

Sulphur (S)

- Basic building block for production of proteins, hormones & vitamins.

Phosphorus (P)

- Essential for photosynthesis and synthesis oils, sugars, starches and enzymes
- Ensures rapid rooting
- Enhances stress resistance

HEADSTART® GOLD
